Professional Summary

Computer Science Engineering student with hands-on full-stack experience across Java, Spring Boot, ReactJS, Node.js, and SQL, built through an internship and independent projects covering REST API design, JWT-based authentication, database integration, and responsive UI development. Comfortable working across the entire stack, from layered backend architecture (Controller/Service/Repository/Entity/DTO) to React-based frontends. Seeking an entry-level Full Stack Developer role to build and ship reliable, scalable software.

Education

Mahendra College of Engineering, Salem **2023 – 2027**
B.E. Computer Science and Engineering CGPA: 7.25
Relevant Coursework: Data Structures and Algorithms (Java), Object-Oriented Programming (OOP), Full Stack Development Course, Database Management Systems (DBMS), Software Engineering

Technical Skills

Programming Languages: Java, JavaScript, SQL
Frontend: HTML5, CSS3, ReactJS, TypeScript
Backend: Spring Boot, Node.js, Hibernate, JDBC, Microservices
Databases: MySQL, PostgreSQL
Tools: Git, GitHub, Postman

Experience

Stellera Edu Tech **Oct 2025 – Dec 2025**
Full Stack Development Intern

- Built frontend and backend modules for a web application, delivering features end-to-end from UI to database integration.
- Integrated REST APIs and developed dynamic application functionality based on project requirements.
- Developed CRUD operations and database queries for core application data management.
- Tested and debugged application modules, resolving functional issues before release to improve application reliability.
- Collaborated with team members throughout development, testing, and maintenance cycles to deliver assigned features on schedule.

Projects

Product Management REST API GitHub
Java, Spring Boot, Spring Security, JPA, PostgreSQL

- Built a RESTful API in Java and Spring Boot with full CRUD operations for product management.
- Applied JWT-based authentication and authorization using Spring Security, including access and refresh token handling.
- Structured the API with Spring Data JPA and PostgreSQL across Controller, Service, Repository, Entity, and DTO layers.
- Added global exception handling for consistent, predictable API error responses.

Food Delivery Application *ReactJS, Node.js, Express.js, MongoDB*

- Built a full-stack food delivery application with user authentication, cart management, and order placement.
- Designed and integrated REST APIs connecting the Node.js/Express backend to the ReactJS frontend.
- Developed responsive UI components and MongoDB-backed data operations for application data management.

E-Commerce Web Application *ReactJS, JavaScript, HTML5, CSS3*

- Built a responsive e-commerce web application for product browsing and online shopping.
- Developed reusable React components for dynamic product rendering and cart management.
- Designed responsive interfaces for product listings and seamless page-to-page navigation.

Achievements

- **Finalist, CATCH 26 Hackathon** – selected as a finalist among participants across Mahendra Institutions.

Certifications

Full Stack Development Course – GUVI

- Full Stack Development, Frontend and Backend Technologies

Full Stack Development Internship – Stellera Edu Tech

- Full Stack Development, Frontend and Backend Development
- REST APIs, Database Integration, CRUD Operations
